

NEXT LEVEL CONFIGURATION SOFTWARE

The successor FL3X Config is in the starting blocks and will replace FlexConfig RBS. The addition RBS is removed because FlexConfig can do much more than Remaining Bus Simulation. FL3X Config is becoming even fairer, easier and more transparent by changing the license model. „FL3X“ is pronounced „FLEX“.

WHY A NEW LICENSE MODEL?

New technical requirements and always shorter development times bring new use cases with them. Our ongoing further development of the configuration software has seen numerous extensions in recent years and completely new functions. The clarity of features suffers. Shorter release intervals accelerate the integration of much-needed features. The new license model considers the greatly increased number of features. The previous allocation per license is distributed unequally to the group of users, a free version „FL3X Config Basic“ is introduced.

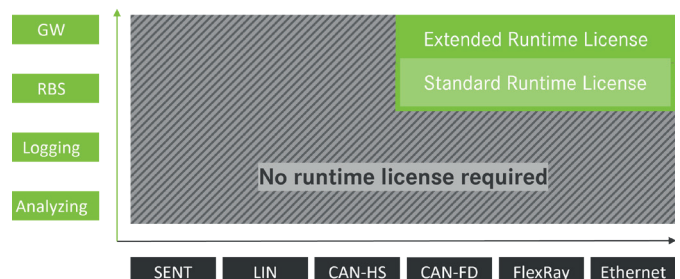

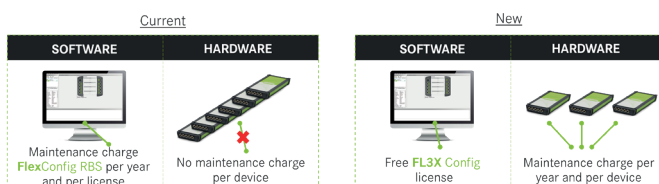

YOU BENEFIT FROM A SIGNIFICANT COST REDUCTION, IF YOU:

- use Remaining Bus Simulation, signal manipulations, analyzing or logging
- have short or variable project durations (≤ 1 Year)
- need no updates of FL3X Config

WHAT ARE THE ADVANTAGES OF THE NEW LICENSE MODEL?

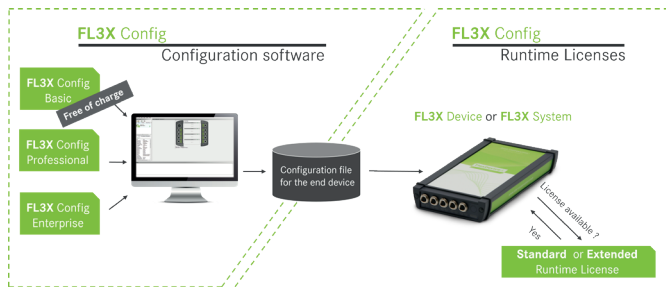

- FL3X Config will be available free of charge in the future. With this version, all applications can be covered on the configuration side.*
- The bus systems CAN-HS, LIN and SENT are free of charge for all use cases.

* Additional convenience features can be optionally added.

FL3X Config

HOW IS THE NEW LICENSE MODEL STRUCTURED?

The configuration software on the PC (e.g. FL3X Config Basic) generates a configuration file for the end device.

In order to be able to use the configuration file on the end device, the appropriate runtime license is required on the end device.

- Each runtime license is valid until a certain date. This date is stored in the device.
- The configuration file is only executed on the end device if the release date of the installed FL3X Config, with which the configuration was created, is before the validity date of the runtime license.

WHICH SUPPORT PACKAGES ARE AVAILABLE?

The free basic support covers all support cases if there is a reproducible error. Additional individual support for project creation, for troubleshooting on the test setup or for the professional explanation of complex functions is increasingly requested.

For this purpose we will offer various support packages in the future for your needs. The following support packages are available.

FL3X Config	Support Package small (1 year)	Support Package middle (1 year)	Support Package big (1 year)
Performance	10 Tickets a 4h	40 Tickets a 4h	160 Tickets a 4h
Training	1 Online Training FL3X Config	1 Online Training FL3X Config	1 Online Training FL3X Config
Response time	regular 1 workday response time, max. 5 workday response time	regular 1 workday response time, max. 5 workday response time	regular 1 workday response time, max. 5 workday response time
Scope	Personal Advisor. Implementation, review, analysis for 1 year from date of purchase.	Personal Advisor. Implementation, review, analysis for 1 year from date of purchase.	Personal Advisor. Implementation, review, analysis for 1 year from date of purchase.

WHEN IS THE RELEASE DATE OF THE NEW LICENSE MODEL?

The new product FL3X Config and the new license model will be introduced on January 1st, 2023. Existing devices can easily be upgraded to the new runtime licenses. Parallel use of FlexConfig RBS and FL3X Config is also possible without any problems. FlexConfig RBS can be used indefinitely.

Last Major Release of FlexConfig RBS is in summer 2022.

There are still bug fixes and minor releases of FlexConfig RBS until the end of Q2/2023.

FL3X CONFIG VERSIONEN:

FL3X Config	Basic	Professional	Enterprise
Drag&Drop for Buses		●	●
Database Update		●	●
Change Device - Automatic Bus Assignment		●	●
Autorouting for Buses		●	●
Create Child Routing		●	●
Create Parent Routing		●	●
Automatic Scaling for Routings		●	●
Find Matching Targets for Routings		●	●
Mark Gateway Elements with Colors		●	●
Highlight Matching Elements for Routings		●	●
Gateway CSV Export		●	●
Gateway Routings Import/Export			●
Projects Optimized for Version-Control Software			●
Projects Optimized for External IDEs			●
UserFunctions Export and Merge			●
License type	no license needed	local	floating
Support level	No guaranteed response time	reg. 1 workday response time, max. 5 workday response time	reg. 1 workday response time, max. 5 workday response time
Communication	Only via E-Mail	Phone & E-Mail	Phone & E-Mail

MAKE THE UPGRADE NOW – CONTINUE TO USE YOUR EXISTING HARDWARE!

If you have purchased FlexConfig RBS or FlexConfig Runtime* within the last 3 years, you will get a proportional discount for new purchases of FL3X Config and the corresponding runtimes. This discount is available within the introductory year 2023 and is based on the purchase price of your FlexConfig RBS/FlexConfig Runtime order.

- Up to 1 year since purchase : 66 % - 100 %
- Up to 2 year since purchase : 33 % - 66 %
- Up to 3 year since purchase : up to 33 %

In addition, there is a 10% discount on FL3X Config and its runtime licenses in the introductory year 2023. **

* This does not apply to bus runtimes of the FlexDevice-S.

** Discount and upgrade offer cannot be combined.

Use of the upgrade offer requires the return/exchange of the old dongle (license).
